PROFILE

Full Stack Developer with hands-on experience of designing, developing, and implementing applications and solutions using a range of technologies and programming languages in both Frontend as well as Backend. Seeking to leverage my skills in a challenging role.

EMPLOYMENT HISTORY

Worked as Solution Analyst - (July 2019 - March 2021)

Sankey Solutions

EXPERIENCE AND SKILLS

Android App Development and Backend Development

- Worked as a lead developer for an android app for farmers, where they could ask questions to Experts, create an Account, like and track their interests and questions in a news feed.
- The farmers could get notifications for new events by different experts, watch and chat on live youtube videos directly within the app.
- Used Drupal for backend and google API's for signup, login, youtube live videos, and live chat.

Website Development and Cloud Infrastructure Management

- Worked with one of the top 10 news organisations of India to manage the website and provide technical support.
- Managed Cloud Infrastructure using AWS and worked on web development using technologies like Drupal, HTML, CSS and Javascript as well as Google Analytics and Google Ad Manager.
- Worked as a lead to create new user interface and functionality design for the website using the mentioned technologies.

Frontend Development using React

- Worked to design new user-interface for a website in react.

Backend Development using Django

- Worked with one of the top automobile manufacturing company in India, on a web portal for their customers to track vehicles and manage business.
- Used django backend with docker and kubernetes in a microservices architecture with CICD using github and jenkins.
