Full Stack Engineer with hands-on experience of designing, developing, and implementing applications and solutions using a range of technologies and programming languages in both Frontend as well as Backend. Seeking to leverage my skills in a challenging role.

EMPLOYMENT HISTORY

Solution Analyst
Sankey Solutions   **(July 2019 - March 2021)**

Fullstack Developer
WhiteSnow Software Consultancy   **(April 2021 - Present)**

EXPERIENCE AND SKILLS

Android App Developement and Backend Developement

- Worked as a lead developer for an android app for farmers, where they could ask questions to Experts, create an Account, like and track their interests and questions in a news feed.
- Used Drupal for backend and google API's for signup, login, youtube live videos, and live chat.

Website Developement and Cloud Infrastructure Management

- Worked with one of the top 10 news organisations of India to manage the website and provide technical support.
- Managed Cloud Infrastructure using AWS and worked on web developement using technologies like Drupal, HTML, CSS and Javascript as well as Google Analytics and Google Ad Manager.

Frontend Developement using React and Angular

- Worked on redesigning a HTML and bootstrap based website for a CMS in react.
- Worked on designing frontend in Angular for one of the top automobile manufacturing company in India.

Backend Developement using Node.js and Django

- Used Node.js as a backend for a data collection application where users created profile, uploaded information and tracked their uploads.
- Used django backend on a web portal to track vehicles and manage business with docker and kubernates in a microservices architecture.
